

Key Actionable Insights for a Cybersecurity Student:

1. Verify the authenticity of websites by checking if they end with ".gov". Official government websites in the United States should use this domain.
2. Ensure that any sensitive information shared online is done so only on secure, official websites that use HTTPS (indicated by a lock icon or "https://" in the URL).
3. Utilize free cybersecurity resources provided by CISA such as Cyber Services, Secure by Design, Secure Our World, Shields Up, and Report A Cyber Issue to enhance your knowledge and skills in the field.
4. Stay informed about recent news, advisories, and directives related to cybersecurity issued by CISA through their News & Events section or directly from their social media platforms (Facebook, Twitter, LinkedIn).
5. Be aware of Emergency Directives, Binding Operational Directives, and Cybersecurity Advisories issued by CISA and take necessary steps as required for mitigating identified vulnerabilities and securing your systems.
6. Register for upcoming webinars or seminars hosted by CISA on various cybersecurity topics to improve your knowledge and preparedness.
7. For media inquiries, contact CISAMedia@cisa.dhs.gov or call 703-235-2010.
